

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application;

--1. (Currently Amended) An organization information recording apparatus for recording organization structures ~~which are~~ formed by combining a plurality of acting organization objects, the apparatus comprising:

an acting organization object recording unit for individually recording said acting organization objects ~~which equip~~ equipped with [[an]] input information, [[an]] output information, [[an]] auxiliary input information, and [[an]] auxiliary output information as properties; and

an acting organization object mode designating unit including an input information designating unit, an output information designating unit, an auxiliary input information designating unit, and an auxiliary output information designating unit for setting a property of a specified object recorded in said acting organization object recording unit.

--2. (Currently Amended) The organization information recording apparatus as cited in claim 1, wherein

~~either one of~~ one of said input information and said auxiliary input information[[, or]] and said output information [[or]] and said auxiliary output information are made exchangeable regarding properties relating to said input information, said output

information, said auxiliary input information, and said auxiliary output information.

--3. (Currently Amended) An organization information recording apparatus for recording organization structures ~~which are~~ formed by combining a plurality of acting organization objects, the apparatus comprising:

an acting organization object recording unit for individually recording said acting organization objects ~~which equip~~ equipped with [[an]] input information[[,]] and auxiliary input information; and

an acting organization object mode designating unit including an input information designating unit[[,]] and an auxiliary input information designating unit for setting a property of a specified object recorded in said acting organization object recording unit.

--4. (Currently Amended) An organization information recording apparatus for recording organization structures ~~which are~~ formed by combining a plurality of acting organization objects, the apparatus comprising:

an acting organization object recording unit for individually recording said acting organization objects ~~which equip~~ equipped with an output information[[,]] and auxiliary output information; and

an acting organization object mode designating unit including

an output information designating unit[[,]] and an auxiliary output information designating unit for setting a property of a specified object recorded in said acting organization object recording unit.

--5. (Currently Amended) An organization information analysis apparatus for analyzing an organization ~~which is~~ expressed by combining a plurality of acting organization objects, the apparatus comprising:

an acting organization object recording unit for individually recording said acting organization objects ~~which equip~~ equipped with [[an]] input information, [[an]] output information, [[an]] auxiliary input information, and [[an]] auxiliary output information as properties;

an acting organization object mode designating unit including an input information designating unit, an output information designating unit, an auxiliary input information designating unit, and an auxiliary output information designating unit for setting a property of a specified object recorded in said acting organization object recording unit; and

an acting organization object analyzing unit for analyzing a performance relating to a combination of a plurality of acting organization objects in accordance with [[the]] a relation between input information property and an output information property based on the objects recorded in said acting organization object recording unit.

--6. (Currently Amended) An organization information analysis apparatus for analyzing organization ~~which are~~ expressed by combining a plurality of acting organization objects, the apparatus comprising:

an acting organization object recording unit for individually recording said acting organization objects ~~which equip~~ equipped with [[an]] input information[[,]] and [[an]] auxiliary input information as properties;

an acting organization object mode designating unit including an input information designating unit and an auxiliary input information designating unit for setting a property of a specified object recorded in said acting organization object recording unit; and

an acting organization object analyzing unit for analyzing a performance relating to a combination of a plurality of acting organization objects in accordance with the input information property based on the objects recorded in said acting organization object recording unit.

--7. (Currently Amended) An organization information analysis apparatus for analyzing an organization ~~which are~~ expressed by combining a plurality of acting organization objects, the apparatus comprising:

an acting organization object recording unit for individually

recording said acting organization objects ~~which equip~~ equipped with [[an]] output information[[,]] and [[an]] auxiliary output information as properties;

an acting organization object mode designating unit including an output information designating unit and an auxiliary output information designating unit for setting a property of a specified object recorded in said acting organization object recording unit; and

an acting organization object analyzing unit for analyzing a performance relating to a combination of a plurality of acting organization objects in accordance with the output information property based on the objects recorded in said acting organization object recording unit.

--8. (Currently Amended) The organization information analysis apparatus as cited any one of claim 5, claim 6, and claim 7, wherein

said acting organization object ~~equips~~ is equipped with an activity contents property expressing contents of activity;

said acting organization analyzing unit carries out a link appropriateness inspection with regard to a plurality of acting organization ~~object~~ objects obtained based on [[the]] properties of said acting organization object.

--9. - 11. (Cancelled)
